PROFESSIONAL SUMMARY

IT Infrastructure Engineer with over 7 years of experience designing, building, and maintaining server, network, and cloud systems for mid-size to enterprise organizations. Skilled in Windows Server and Linux administration, virtualization, network management, foundational cybersecurity, and hybrid cloud implementation (AWS and Azure). Experienced in applying ITIL practices, infrastructure automation, and maintaining system uptime SLAs above 99.9%.

TECHNICAL SKILLS

- Operating Systems: Windows Server 2016/2019/2022, Red Hat Enterprise Linux, Ubuntu Server, CentOS
- Virtualization: VMware vSphere/ESXi, Microsoft Hyper-V, Proxmox VE
- Cloud Platforms: Amazon Web Services (EC2, S3, VPC, IAM, RDS), Microsoft Azure (VM, VNet, AD)
- Networking: Cisco Switching & Routing, Mikrotik, VLAN, Site-to-Site VPN, Firewall (Fortinet, pfSense)
- Automation & Scripting: Ansible, PowerShell, Bash, Terraform (basic)
- Monitoring & Backup: Zabbix, Nagios, Veeam Backup & Replication, Grafana
- Directory & Identity: Active Directory, LDAP, Group Policy, Azure AD
- Security: Server hardening, patch management, endpoint protection, access control policy
- ITSM & Collaboration: ITIL Foundation, Jira Service Management, Confluence

WORK EXPERIENCE

Senior IT Infrastructure Engineer

PT Data Nusantara Teknologi — Jakarta, Indonesia | March 2022 – Present

- Led migration of on-premise infrastructure to a hybrid cloud architecture (AWS and Azure) covering over 300 servers, reducing operational costs by 22%.
- Designed and managed an enterprise network spanning 12 branch offices with site-to-site VPN and failover redundancy.
- Implemented server configuration automation using Ansible, cutting deployment time from 4 hours to 30 minutes per server.
- Maintained uptime above 99.95% for critical systems through proactive monitoring with Zabbix and Grafana.
- Led a team of 4 engineers in incident response and remediation aligned with ITIL standards.

IT Infrastructure Engineer

PT Solusi Jaringan Indonesia — Semarang, Indonesia | January 2019 – February 2022

- Managed and maintained over 150 physical and virtual servers running Windows Server and Linux.
- Set up and administered Active Directory, Group Policy, and DNS for over 800 users.
- Configured and maintained backup systems using Veeam, achieving a 100% successful restore rate during the annual audit.
- Collaborated with the security team on server hardening and monthly patch management policies.
- Handled advanced network troubleshooting including routing, switching, and VLANs on Cisco and Mikrotik devices.

Junior Network & Server Administrator

PT Mitra Teknologi Digital — Semarang, Indonesia | July 2017 – December 2018

- Assisted with the installation and configuration of servers, workstations, and network devices for corporate clients.
- Performed routine maintenance, monitoring, and tier 1-2 technical support for internal IT infrastructure.
- Documented standard operating procedures (SOPs) for network device installation and configuration.

EDUCATION

Bachelor of Informatics Engineering

Universitas Diponegoro — Semarang, Indonesia | 2013 – 2017 | GPA 3.52 / 4.00

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2023)
- Microsoft Certified: Azure Administrator Associate (2022)
- Cisco Certified Network Associate (CCNA) (2020)
- ITIL Foundation v4 (2021)
- Red Hat Certified System Administrator (RHCSA) (2019)
